

Why Samsung Ductless and VRF Systems?

The Samsung brand has been long known for their technology and innovation. That holds true with their ever-growing line of ductless mini splits and VRF systems.

Max Heat Outdoor Units

- Multi-port connection offers more ports and the same BTUs **AT THE SAME PRICE POINT** as competitors
 - 20K BTU 3 port vs competitor 2 port
 - 24K BTU 4 port vs competitor 3 port
 - 30K BTU 4 port is a unique offering in the market
- Provides 100% of the heating capacity at 5°F and high heating output at -13°F
- Base pan heater built in
- Multi-Zone units have built in self-diagnostic startup with auto addressing

Wind-Free™ Indoor Units

- Maintains the desired temperature and eliminates cold drafts by delivering dispersed air through the unit's micro holes
- AI Auto Mode learns the activity patterns within the home and automatically adjusts system operation to maximize comfort
- All high wall units come Wi-Fi enabled while other indoor units are Wi-Fi capable

Samsung is one of the few manufacturers able to offer Single Phase VRF Heat Recovery

- Compact system provides high-efficiency heating and cooling for residential and light commercial applications
- Heat Recovery technology allows for heating and cooling of separate zones simultaneously
- Connect up to 10 indoor units on a single Samsung DVM S Eco system
- Consider a DVM single phase as an alternative to multi-port systems

Preferred Dealer Program

- Samsung offers one of the best programs on the market
- Up to 12-year warranty on parts
- Limited one-year warranty on labor with option to upgrade to 12 years
- Every system you register earns you points to be used in an online catalog with an assortment of items from all different brands
